

**MANUFACTURE OF ESD STATIC CONTROL PRODUCTS
AND FACILITY TOUR**

The DESCO Industries plant in Canton, MA is responsible for manufacturing a wide range of ESD protective equipment, ranging from ESD bags to wrist straps, bottles, and floor wax. This facility tour will show each step of their operations and how each of these items is constructed. The Canton plant also handles the research and development operations for DESCO, finding new solutions for ESD problems. DESCO is working on a variety of new products to solve current industry problems like ESD bag longevity. This meeting will start with a short presentation of description and will be followed by the factory tour and demonstrations.

When: Wednesday, March 17, 2010 at 5:30 PM – 7:00PM

Where: DESCO Industries

One Colgate Way, Canton, MA

Just off Rt. 95

Following the evening's discussions, you may join us at individual expense for dinner immediately afterward at a restaurant nearby.
